Data professional with hands-on experience in both AI data annotation and data analysis. Currently working as a Data Annotator on an Autonomous Driving project, specializing in 2D image and 3D LiDAR point cloud annotation, including Bounding Box, Cuboid, Polygon, Semantic Segmentation, and Object Detection. Previously worked as a Data Analyst Intern analyzing operational data and developing dashboards using Microsoft Excel, with a foundation in SQL and Power BI.

Work Experiences

KUPU ID-Mindflow – Central Jakarta, Jakarta February 2026 - Present

Data Annotator – Autonomous Driving (Xiaomi Project)

- Annotate 2D image and 3D LiDAR point cloud datasets to support autonomous driving AI model development.
- Perform Bounding Box, Polygon, Semantic Segmentation, Cuboid, and Object Detection annotations following detailed project guidelines.
- Label dynamic and static traffic objects, including vehicles, pedestrians, traffic signs, traffic lights, barriers, traffic cones, road infrastructure, and weather-related LiDAR point cloud artifacts.
- Utilize an internal CVAT-based annotation platform to produce high-quality training datasets for computer vision models.
- Maintain a minimum 98% quality acceptance rate while handling high-volume annotation tasks and meeting project quality standards.

PT. Satria Raksa Buminusa – South Jakarta, Jakarta October 2023 - December 2023

Data Analyst Intern

- Analyzed attendance data of 200+ security personnel using Microsoft Excel, identifying weekly attendance rates around 80%, which prompted management to issue reminders and formal warnings to improve compliance with app-based attendance procedures.
- Managed and updated *Smart Patrol* app accounts for 200+ security personnel, ensuring accurate and reliable personnel records.
- Developed a dashboard to track weekly patrol activity for 200+ security personnel using data extracted from the *Smart Patrol* admin portal, enabling individual performance monitoring.
- Built a *KTA Summary Dashboard* to monitor 800+ security personnel ID cards across 18 projects, enabling real-time tracking of card status including active, expired, under extension, and personnel without ID cards.

Skills

- **Data Annotation:**
 - **Image Annotation:** Bounding Box
 - **LiDAR Point Cloud Annotation:** Polygon Annotation, Semantic Segmentation, Cuboid Annotation, Object Detection
- **Data Analysis & Reporting:**
 - **Microsoft Excel:** PivotTable, VLOOKUP, Power Query, Data Cleaning
 - **Power BI Desktop:** Power Query, Visualization
- **Query & Programming:**
 - **SQL:** Basic to Intermediate (SELECT, JOIN, WHERE)
 - **Python:** Basic (planning to learn NumPy & Pandas)

Education

Universitas Gunadarma – Depok, West Java October 2015 - August 2021
Bachelor of Information Systems, 3.32/4.00

Certifications

- **Career Essentials in Data Analysis** – Microsoft and LinkedIn July 2025
[View Credential](#)
- **Responsive Web Design** – freeCodeCamp May 2024
[View Credential](#)
- **EF Set English Certificate (C2 Proficient)** – EF SET August 2023
[View Credential](#)

Additional Information

- **Languages:** Bahasa Indonesia (Native), English (Proficient)
 - **Indonesian** – Native
 - **English** – C2 Proficient
